

YOU'RE INVITED:

OVERCOMING THE CHALLENGES OF MANAGING PERSISTENT PAIN IN OLDER ADULTS

This is a Mundipharma meeting and its products will be discussed.

AGENDA (1 hr):

- 30 mins **Challenges and approach to managing pain in the elderly**
- 20 mins **Case Study**
- 10 mins **Q&A**

OVERVIEW:

Many older adults suffer from persistent pain that adversely affects independence and quality of life¹. Pain management is challenging in this age-group because of the declining organ function, the presence of concurrent diseases and polypharmacy.¹ In this webinar, we will discuss practical recommendations that will help improve identification, assessment of pain and pain management in older patients.

SPEAKER:

Professor Fabio Guerriero, MD, PhD
Geriatrician at Azienda di Servizi alla Persona
of Pavia Post-doctoral researcher at University
of Pavia, Department of Internal Medicine and
Therapeutics, Section of Geriatrics

In 2006 he graduated magna cum laude in Medicine and Surgery at the University of Pavia (IT). Then he attended the School of Specialization in Geriatrics and Gerontology at local University and he became Geriatrician in 2011. During his specialization he attended a 6-month clinical attachment at NHS South Essex Partnership Trust (UK), working as Consultant Psychiatrist of Old Age. From 2012 to 2015 he attended PhD Programme in Internal Medicine and Therapeutics at University of Pavia and he got his PhD in 2015. He worked as post-doc researcher at University of Pavia. Since 2018 he is working as geriatrician at NHS St. Margherite Geriatric Institute of Pavia.
